

NATURAL LEADER

~ From 1964 ~

MADERAS GARCÍA VARONA IS A BUSINESS GROUP COMMITTED TO INTEGRAL MANAGEMENT OF FORESTS' PRODUCTS WE CARRY ON A 360° HARNESSING OF THE RAW MATERIAL PROVIDED BY FRENCH FORESTS

We are specialists in European oak. Our commitment to quality has led us to control the entire manufacturing process of our products, from the selection of the trunk to the final finish.

We produce raw material for the timber industry, with which we closely work. We are manufacturers, so we can offer a highly competitive price.

SUSTAINABILITY COMMITMENT

Sustainable and legal source

The commitment to sustainability is one of our pillars.

We have a direct link to the source, the European forests of oak.

This is the best way to ensure that the wood comes from a source sustainable and legal,

respecting the environment, biodiversity and forest regeneration capacity.

Local employment

We are committed as well to the employment promotion. We believe that it allows the development of rural communities.

Wood consumption means regeneration of woodland, work and increase of the population in rural areas, threatened with depopulation.

PEFC certified

We have the PEFC certified, which aims to ensure that the world's forests are managed responsibly and protected for present and future generations.

Also certifies that forests products derived from a certified forests are processed and marketed with good environmental practices.

CE marking

Guarantees that our products fulfil European directives for placing them on the market.

Traceability enables us to keep track of our products from the forest to the final finish, and quality control from the source.

APECF Label

European accreditation which means that Maderas Garcia Varona is committed to carry out the first white oak industrial processing in the European Union's territory.
